

Please do not implement any proposal that would lessen the protection we currently receive under Indiana's Telephone Privacy law. As a busy family, we have limited time together. It generally centers around our evening meal. Prior to Indiana's legislation, we were continually interrupted by unwanted solicitations via the phone. They would target the dinner hour to try to make sure that we would be home. Indiana's legislation has had a very positive effect on our family time and we would hope to retain its protections. Thank you.
